DETAILED ACTION

Election/Restrictions

1. Claims 5, 8, and 14-15 are hereby withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected species, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in the reply filed on 7/28/05.

2. Applicant's election with traverse of Species A in the reply filed on 7/28/05 is acknowledged. The traversal is on the ground(s) that the examination of the additional species and claims would not unduly burden the examiner. This is not found persuasive because the examiner would be unduly burdened by the extensive search and examination of the additional species and claims. The requirement is still deemed proper and is therefore made FINAL.

Specification

3. Applicant is reminded of the proper language and format for an abstract of the disclosure.

The abstract should be in narrative form and generally limited to a single paragraph on a separate sheet within the range of 50 to 150 words. It is important that the abstract not exceed 150 words in length since the space provided for the abstract on the computer tape used by the printer is limited. The form and legal phraseology often used in patent claims, such as "means" and "said," should be avoided. The abstract should describe the disclosure sufficiently to assist readers in deciding whether there is a need for consulting the full patent text for details.

The language should be clear and concise and should not repeat information given in the title. It should avoid using phrases which can be implied, such as, "The disclosure concerns," "The disclosure defined by this invention," "The disclosure describes," etc.

Art Unit: 3612

4. The lengthy specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

Claim Objections

5. Claim 1 is objected to because of the following informalities: on line 2, "a vehicle" should be "the vehicle". Appropriate correction is required.

Claim Rejections - 35 USC § 112

6. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

7. Claims 1-4, 6-7, 9-13, 16-22 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1 recites the limitation "the apertures" in line 11. There is insufficient antecedent basis for this limitation in the claim.

Claim 11 recites the limitation "apertures" in line 8 and line 11. There is insufficient antecedent basis for this limitation in the claim.

Claim 20 recites the limitation "at least one shelf" in line 19. There is insufficient antecedent basis for this limitation in the claim.

Claim 21 recites the limitations "the drawer slides" in line 2, "the center drawer slide" in line 3, "one or more drawers" in line 4, "each drawer slide" in line 5, and "said center drawer slide" in line 6. There is insufficient antecedent basis for these limitations in the claim. It is

unclear whether or not the applicant intended this claim to actually depend from claim 21 or to be dependent upon claim 20 as currently recited.

Claim Rejections - 35 USC § 103

8. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

9. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

10. Claims 1-3, 9, 11, and 13 are rejected under 35 U.S.C. 103(a) as being unpatentable over Sevey in view of Olerio and Brindle.

Sevey (4,681,381) discloses the claimed invention except for a shelf and end panels formed from a polymer material.

Olerio (5,988,476) teaches a polymer formed rack system including a polymer shelf of polypropylene.

Art Unit: 3612

It would have been obvious to one of ordinary skill in the art at the time the invention was made to have provided the shelf and end panels of Sevey out of a polymer material as taught by Olerio in order to allow the shelf to be strong and lightweight for easy movement.

Sevey, as modified, further lacks the frame system fastened to a wall of a vehicle.

Brindle (2,978,153) teaches the desirability of attaching a storage unit to a vehicle.

It would have been obvious to one of ordinary skill in the art at the time the invention was made to have provided the storage system of Sevey, as modified, upon a vehicle as taught by Brindle in order to allow for transportation of cargo within the storage unit.

Allowable Subject Matter

11. Claims 23 is allowed.

12. Claims 4, 6-7, 10, 12, and 16-17 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

13. Claims 18-22 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.

Conclusion

14. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
